

All the written task should be done in Notebook or as mentioned

MATHS

Task 1: Information Task: Read the following information to know units of measurement.

- Measurement can be done by using hand span, cubit or foot length.
- The above mentioned units are not standard units of measurement.
- We can measure length accurately with the help of ruler or a measuring tape.
- We measure bigger objects in meters.
- Centimeter is used to measure very small lengths.
- Short form of meter is (m) and centimeter is (cm).
- Kilometers are used to measure long distances.
- 100 Centimeters = 1 meter or 100 cms = 1m
